TABLE TOP

Our reclaimed furniture is handcrafted from vintage barn wood by our team of Pennsylvania Amish craftsmen. Each board is selected for its special characteristics like color, knots, and nail holes before being given new life as a beautiful piece of restaurant furniture. From there, each piece of furniture is left as a natural reclaimed finish or given one our other rustic finishes.

## Red Oak

Red Oak is one of the most popular species of wood for table tops and other furniture because of its hardness and durability. Red oak has a prominent grain that often appears as an arched pattern.

## Maple

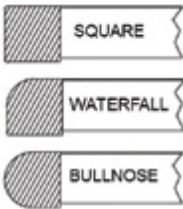

Maple is a hard wood that has a smooth, subtle grain pattern and barely visible rings. The colors range from light to medium, but color variations are minor compared to some species of wood.

Butcher block tables are constructed by gluing the face grain together to expose the edge grain on top. This process makes for a harder top surface that is less likely to check or split due to temperature conditions.
